Analog and digital output modules

5-2

Analog capacitive humidity sensors

3-3-3

Analog output - end	6-49
Analog output - start	6-49
Analog output cable	5-2
Analog output functions	6-49
Analog output type	6-49
Analog outputs	5-6, 6,53
Angle of rotation measurement	4-8
Assignment of alarm relays to limit values	6-51
Atmospheric pressure	6-7
Atmospheric pressure sensor	3-4-1
Averaging	6-14, 33
Averaging	1-6
Averaging mode	6-14, 6-34
Averaging over measured values from several measuring points	6-36
Averaging over several manual measuring point scans	6-35
Axial turbine flowmeter	3-6-35
B	
Bluetooth links	5-20
Bluetooth wireless modules	5-19
Bridge circuit	4-9
C	
C ₂ H ₄ O	3-9-15
Cable laying	3-10-2
Cable length	3-10-1
Calculation function	1-4, 6-12
Capacitive sensors	3-3-1
Capacitive thin-film sensor	3-3-5
Carbon dioxide gas sensor module	3-9-19
Carbon dioxide sensor, hand-held FYA 600 CO ₂ H	3-9-20
Carbon monoxide	3-9-16
Carbon monoxide gas sensor	3-9-17
CCC dew-point method (Heinze)	3-3-51
Changing the baud rate	6-55
Changing the input multiplexer	6-46
Changing the output function	6-48
Changing the units	6-12
Channel for analog output	6-50
Chemical probes	3-9-1
Chlorine gas	3-9-17
Choosing a temperature sensor	3-1-1
Cl ₂	3-9-15
CO	3-9-15
CO ₂ concentration	3-9-19
CO ₂ measurement	3-9-19

CO ₂ probe for gases	3-9-19
CO ₂ sensor for gases	3-10
Cold junction	3-1-3
Cold junction compensation	4-6
Cold junction temperature measurement	6-33
Cold junction temperature sensor integrated in the connector	6-33
Column format	6-26
Commands overview	7-2
Compensation lines	3-1-3
Conductive plastic potentiometer	3-6-29
Conductivity	1-4, 3-9-9
Conductivity probe	3-10, 3-9-9
Conductivity probe for moisture in wood	3-3-32
Configuration of output modules	6-51
Connecting pH probes	3-9-4
Connecting your own sensors	4-2
Connector with 12V supply	4-11
Constant cold junction temperature	6-33
Continuous averaging over time	6-36
Continuous measured value output	6-24
Continuous measuring point scan	6-22
Control panel and control cabinet devices	2-2
Conversion rate	1-4, 6-13
Converting between units	6-13
Correction values	6-15
Current clamp, a split-core transformer	3-7-1
Current measurement	4-15
Current measuring operations	4-6
Current transformers	3-7-1
Cyclic averaging over print cycle	6-36
Cyclic output	6-24
D	
D6	3-4
D6 measuring ranges	3-6
Data acquisition systems	2-2
Data format	6-55
Data logger	6-38
Data transmission via modem	5-8
Data transmission via RS422 interface	5-14
Date	6-8
Date	1-6
DC measuring module	4-14
DC voltage	4-14
Decimal point setting	6-15
Decimal point shift	6-16
Degree of absorption	3-8-5

Delete all measured values at the start of a measuring operation	6-56
Desktop devices	2-2
Determining thermal transmittance coefficients	3-2-5
Device addresses	5-11
Device configuration	6-55
Device connection	5-20
Device designation	6-6
Device generations	1-1, 1-4
Device programming	6-5, 7-13
Device-internal elements	6-53
Dew detector	3-3-52
Dew-point diagram for compressed air	3-3-55
Dew-point measuring, mirror method	3-3-51
Dew-point sensor FHA 646 DTC1	3-3-53
Dew-point sensors	3-3-51
DHCP server (dynamic host configuration protocol)	5-10
Differential pressure	3-6-1
Differential pressure transmitter FD A602D	3-6-10
Differential pressure transmitter for very small pressures	3-6-15
Differential voltage measurement	4-4
Diffuse celestial radiation	3-4-11
Diffuse light	3-8-5
Digital ALMEMO® D6 sensor	3-4
Digital capacitive humidity / temperature sensor	3-3-7
Digital humidity sensors	3-9
Digital input cable	4-23
Digital interfaces	2-9
Direct current (DC)	4-14
Disabling cold junction compensation	6-13
Disabling electrical isolation	6-47
Displacement gauge	3-6-28
Displacement transducer	3-6-28
Divider connector	4-7
Driving the output relays	6-54
Dry mass percentage	3-3-26
Dynamic pressure	3-5-14
Dynamic pressure measuring modules	3-5-14

E

Electrical converters	3-7-1
Electricity meter scanning	3-7-4
Electrochemical reaction	3-9-18
Electrochemical sensors	3-9-15
Element flags	6-47
Emissivity	3-1-8

Emissivity factor	3-1-9
End time-of-day	6-28
Ethylene oxide	3-9-17
Extension cable for ALMEMO® sensors	3-10-1
Extensions for connecting cables	3-10-1
External triggering	6-29

Interface elements	6-53
Interface modules	5-7
Interface modules, technical data	5-23
International temperature scale (ITS)	3-1-6
Inverted operation	6-54
IP address	5-10
Irradiance	3-8-2, 3-8-6
Irradiance probe FLA 613 VLM	3-8-25

K

KTY84 4-3

L

Light sensor 3-10
 Light transmission coefficient 3-8-5
 Limit values 1-4, 1-8, 6-14,
 7-10
 Line voltage drop 4-11
 Linear inductive displacement transducer 3-6-29
 Linear memory 6-56
 Linearization 6-18
 List 6-26
 Load capacity 5-6
 Luminance 3-8-2
 Luminance probe FL A603 LDM2 3-8-30
 Luminous flux 3-8-1
 Luminous flux probe FLA 603 LSM4 3-8-32
 Luminous intensity 3-8-1

M

Macros 1-8, 6-29
 Mains frequency noise suppression 6-56
 Matrix measurements 3-5-22
 MAXIMUM VALUE 6-22
 Mean flow velocity 3-5-22
 Measurable radiation 3-1-8
 Measured data output 6-42
 Measured data recording 6-39
 Measured value acquisition 6-21
 Measured value memory 6-38
 Measured value output 6-23
 Measured value processing 7-2
 Measured value scaling and correction 7-10
 Measured value smoothing 6-34
 Measured values 1-3, 1-4, 1-5, 1-7,
 6-21
 Measured values in column format 6-26
 Measured values in list format 6-26
 Measuring a voltage 4-14
 Measuring bridge switch 6-47
 Measuring bridges 4-9
 Measuring current for resistance sensors 6-47
 Measuring cycle 6-25
 Measuring duration 6-28
 Measuring force, basic principles 3-6-22
 Measuring functions 2-4

Measuring functions for measuring point scans	6-32
Measuring humidity, basic principles	3-3-2
Measuring modules for thermocouples	4-20
Measuring moisture tension. basic principles	3-3-42
Measuring oxygen in water	3-9-30
Measuring point designation	6-13
Measuring point scan	1-3, 1-4
Measuring point scan	6-21
Measuring point scan and output, once-only, manual	7-5
Measuring point scans, measured data recording and output	7-3
Measuring ranges	1-3, 2-5, 7-8
Measuring solution	3-9-9
Measuring the moisture in materials, basic principles	3-3-24
Measuring the TRMS (true root-mean-square)	4-19
Measuring thermal radiation, basic principles	3-1-8
Memory connector	1-4, 1-7, 6-38
Memory output	6-42
Memory readout	6-3
Menu configuration	7-16
Meteo Multi sensor FMA 510	3-4-17
Meteorological sensors	3-4-1
Minimum sensor supply voltage	6-48
MINIMUM VALUE	6-22
Mobile weather station	3-4-25
Moisture content by volume	3-3-25
Moisture content probe	3-3-1
Moisture content probe, capacitive	3-3-28
Moisture content probes	3-3-24
Moisture content sensor	3-9
Moisture content sensor FH A696-GF1	3-3-39
Moisture in materials	3-3-1
Moisture in wood and water content, basic principles	3-3-36
Moisture or water content	3-3-25
Moisture or water percentage	3-3-25
Moisture percentage by volume	3-3-25
Moisture tension	3-3-42
Moisture tension meter for moisture in the soil	3-3-42
Moisture tension meter, electronics	3-3-44
Moisture tension meter, insert type	3-3-48
Moisture tension meter, surface type	3-3-48
Monitor mode	6-42
MS Excel	6-4
MT 84x5	3-5-12
MU connector	4-5
Multi-point calibration	1-6, 6-18
Multimedia card (MMC)	1-7, 6-38

N

Network cable	1-3, 5-12
Network cable with optic fiber	5-13
Network distributor	5-14
Network driver	5-15
Network driver, Ethernet - RS422	5-18
Networking of measuring instruments	5-11
New developments 2002	1-1, 1-5
New developments 2006/2007	1-1, 1-7
NH ₃	3-9-15
Ni100	4-3
Nitrogen dioxide	3-9-17
Nitrogen oxide	3-9-17
NO	3-9-15
NO ₂	3-9-15
Noise voltage, interference	6-56
Non-contacting displacement measuring systems	3-6-29
NTC psychrometer FN A846-3	3-3-23
NTC sensor(negative temperature coefficient)	4-3
Numbering of measuring operations	6-37

O

O ₂ probe for gases	3-9-23
O ₂ probe for water	3-9-30
O ₂ sensor for gases	3-10
O ₃ probe for gases	3-9-27
Object radiation	3-1-8
Ohms	4-3
Once-only output	6-23
Operating parameters	6-55
Operation via the serial interface	6-3
Operation via a computer terminal	6-4
Operation via AMR-Control software	6-3
Optic fiber	5-8
Optical probe for electricity supply meters	3-7-4
Optical probes for indoor applications	3-8-8
Optical probes for outdoor applications	3-8-20
Optical probes, basic principles	3-8-1
Optical probes, high resolution	3-8-30
Optical radiation	3-8-1
Option SB0000R2	3-6-8
Optocoupler	5-6
Other thermal coefficients	3-2-10
Output format	6-26
Output measured value list	6-22
Output modules	1-5, 1-7, 1-8

Output of device configuration	6-6
Output of device parameters	7-14
Output of device version	6-54
Output of extended sensor programming	6-45
Output of programming	6-5
Output protocols	6-27
Outputs	2-9
Outputs from measured value memory	7-6
Overpressure	3-6-1
Oversampling	6-56
Oxygen measurement	3-9-32
Oxygen measuring cell	3-9-23
Oxygen sensor	3-9-23
P	
Passive extension cables	3-10-1
PC links and connections	5-20
Peak values	6-21
pH and redox probes	3-9-1
pH measurement	3-9-1
pH measuring chains	3-9-1
pH probes	3-10
pH value	3-9-1
Photometry	3-8-1
Photosynthesis probe FLA 603 PS4 / PS5	3-8-42
Physical concentration units	3-9-15
Physical transducers	3-6-1
Piezo-resistive sensors	3-6-1
Pin assignment	4-2
Pitot tubes	3-5-1
Plug-in pressure measuring probe	3-4-2, 3-5-16, 3-6-20
Port addresses	6-53
Potentiometer sensors	4-8
Prandtl Pitot tube	3-5-14
Pressure compensation	6-32
Pressure sensors	3-6-1
Pressure transducer for measuring temperature	3-6-7
Pressure transducer, for wall mounting FD 8612 DPS	3-6-12
Pressure transducers	1-4, 3-10
Print cycle	1-5, 6-25
Print cycle factor	1-5, 6-49
Probe	3-7-4
Probe for gases	3-9-15
Probes for measuring optical variables	3-8-1
Procedure for measuring the U value	3-2-7
Process control	7-3

Program the simulator	7-15
Psychrometer	3-3-1, 20, 3-9
Pt100	4-3
Pt100 psychrometer FP A836-3	3-3-23
Pt1000	4-3
PTC sensor (positive temperature coefficient)	4-3
Pulse measuring	4-22, 6-32
Push and pull sensors	3-6-27
Push sensors	3-6-26
Putting a network into service	5-19
PWM signal (pulse-width modulation)	5-2

Q

Quantum probe FLA 623 PS	3-8-18
--------------------------	--------

R

Radiant density	3-8-2
Radiant intensity	3-8-2
Radiation capacity	3-8-2
Radiation flux density	3-4-11
Radiation intensity	3-4-11
Radiometric probe FLA 603 RW4	3-8-40
Radiometry	3-8-2
Rainfall and precipitation sensor	3-4-8
Rainfall detector	3-4-9
Rainfall measurement	3-4-17
Reading device	6-44
Reading out from external storage cards	6-44
Redox measurement	3-9-6
Reference measuring points	6-12
Reference value	6-15
Reflective photoelectric sensors	3-6-43
Reflectivity	3-8-5
Refrigerant temperature	3-6-8
Relative pressure	3-6-1
Relay	5-6
Relay adapter	5-4
Relay trigger analog adapter	5-5
Relay trigger cable	5-3
Resistance sensor	3-1-5, 4-3
Resistance-based temperature sensor	3-7
Ring memory	6-56
Rotating vanes	3-9, 3-5-1, 3-5-19
RS232 data cable	5-7
RS232 data cable with optic fiber	5-8
RS485 interface	5-19

S

Sampling a meter LED	3-7-6
Saving data to external storage media	6-38
Saving to memory, start time	6-43
Scaling	6-15
Scanning modes	1-8, 6-41
SD card (secure digital)	6-38
Selecting a measuring instrument	6-5
Selecting a measuring point	6-21
Selecting the input channel	6-9
Selecting the measuring range	6-10
Selective memory output	6-43
Semi-continuous measuring point scan	6-22
Sensor breakage detection	6-47
Sensor connections	5-21
Sensor locking	6-18
Sensor module FY A600-CO2	3-9-21
Sensor overview	3-7
Sensor power supply	4-2
Sensor programming	6-8, 7-8
Setting the measured value to zero	6-16
Short-wave radiation balance	3-4-12
Shunt connector	4-6
Signal delays	5-12
Simulating a final value	6-47
Sleep mode	6-41
Sliding average	6-34
Smart media card	1-5
Smoothing	6-34
SO ₂	3-9-15
Socket P0	6-53
Solar radiation, determining its intensity	3-4-11
Special functions	6-45, 7-11
Special measuring ranges	2-7, 6-18
Special plug connectors	4-6
Spectral evaluation function	3-8-3
Speed measurement	4-23
Spreadsheet software	6-4
Standard conditions	6-37
Standard plug connector	4-2
Standard volume flow	6-37
Start cyclic measuring point scan and output	7-5
Start time / end time	6-28
Starting and stopping a measuring operation	6-26
Static pressure	3-5-14
Stationary psychrometer FP A836-3; FN A846-3	3-3-23

Structural statics sensors	3-2-1
Sulfur dioxide	3-9-17
Summation	6-32
Switch signal transmitter OFF	6-56
Switchover delay	5-12
T	
Table format	6-26
Tachometer	3-6-43
Tachometer probes	3-10
Technical data	2-8, 5-6
Temperature and humidity in outdoors applications	3-4-14
Temperature compensation	6-7, 7-2
Temperature compensation for air velocity	3-5-17
Temperature drift	5-6
Temperature measuring ranges for refrigerants	3-6-8
Temperature sensor	3-1-1
Temperature-compensated pressure transducers FD 8214	3-6-4
Tension meter	3-3-44
Terminal	6-4
The ALMEMO® system	1-1, 1-2
Thermal coefficient	3-2-5
Thermal conductance coefficient	3-2-5
Thermal conductance resistance	3-2-2
Thermal conductivity	3-2-1
Thermal connector	4-6
Thermal penetration coefficient	3-2-1
Thermal radiation	3-2-1
Thermal surface transfer coefficients	3-2-5
Thermal surface transfer resistance	3-2-1
Thermal transmittance (U)	3-2-5
Thermal transmittance coefficient (U)	3-2-1
Thermal transmittance resistance	3-2-2
Thermoanemometer	3-10, 3-5-1, 3-5-4
Thermoanemometer FV A605 TA	3-5-7
Thermoanemometer FVA 935 THx	3-5-5
Thermoanemometer MT 84x5	3-5-12
Thermocouples	4-2, 3-1-2, 3-7
Thick-film sensors	3-6-1
Thin-film sensors	3-6-1
Time frame	6-43
Time-of-day	6-8
Total radiation	3-1-8
Transmission coefficient	3-8-5
Trigger cables	1-4, 5-3
Trigger function	6-29

Trigger inputs	5-6, 6-53
Tripod stand	3-4-26
TRMS converter	4-12
True root-mean-square value (TRMS)	4-17
Turbine flowmeter	3-10, 3-6-32

U

USB driver	5-21
USB reading device	6-44
USB-to-RS232 converter	5-9
Using pH and redox probes	3-9-6
UV index	3-8-7
UV probe FLA 613 UV	3-8-10
UV-A probe FLA 603 UV 22 / 24	3-8-38
UV-A probe FLA 613 UVA	3-8-22
UV-A probe FLA 623 UVA	3-8-11
UV-A probe FLA603UV 12/14	3-8-36
UV-A probe - with spherical head	3-8-27
UV-A radiation	3-8-6
UV-B probe FLA 613 UVB	3-8-23
UV-B probe FLA 623 UVB	3-8-12
UV-B radiation	3-8-7
UV-C probe FLA 623 UVC	3-8-14

V

V5 device	2-8
V5 output cables	5-3
V5 output modules	6-51
V6 devices	2-8
V6 output cables	5-4
Variants	1-4
Voltage measurement	4-4
Volume flow measurement	1-5, 1-6, 3-5-21, 6-37
Vortex flowmeter FV A645 GVx	3-6-39

W

Watchdog	6-54
Water detection probe	3-3-49
Weather-proof housing ZB 9510 AG	3-4-26
Wet-bulb globe temperature (WBGT) measurement	3-1-7
Wind direction sensor	3-4-6
Wind intensity	3-4-3
Wind measurement	3-4-17
Wind scale	3-4-3
Wind velocity sensor	3-4-3
Wire strain gauges	4-9
Wireless links, putting into service	5-21

Wireless standard	5-22
Wood moisture - definition	3-3-36
Wood moisture probe for long-term measuring	3-3-34

Z

ZA 9610-AKY4	3-9-3
ZA 9612-FS	3-6-23
ZA9020VK	3-10-1
ZA9020VKP	3-10-2
ZA9060VK	3-10-1
ZA9090-VKC	3-10-1
ZA9105FSx	3-6-24
ZB 9602 TMxx	3-3-48
ZB9600SKx	3-3-4
Zero-point adjustment	6-15
Zero-point adjustment for pressure transducers	3-5-17
